PROJECTS

HungerMatch | *Sole Developer* | <https://expo.io/@cacelii/hungermatch>

A mobile and web app built for indecisive eaters to narrow down their nearby restaurant choices

- Mobile version developed with self-taught React Native, React Navigation, and Yelp's API
- Web version developed with React-Redux, Express, Yelp's API, Passport.js for Google and Facebook OAuth, and authentication via local email and password

Global Kitchen | *Developer* | <https://global-kitchen.herokuapp.com/>

A multi-platform kitchen simulator game that introduces players to international recipes

- Taught myself Pixi.js and created our own sprites and atlases
- Implemented unique station animations/timer, screen view changes, character movement, Redux
- Developed with Pixi.js and Redux through Agile Project Management
